

EXECUTIVE SYSTEMS GUIDE

ADMINISTRATOR OPERATIONS MANUAL

Complete, end-to-end visual operating handbook for Executive Administrators. Details every system workflow, button action, financial ledger procedure, OTP invitation management, student enrollment, and compliance audit trail.

DOCUMENT CLASSIFICATION

Internal Operations / Executive

SOFTWARE VERSION

Thoorigai Core v1.0.0 (Next.js 16)

AUTHORIZED ROLES

Executive Administrator (role='admin')

EFFECTIVE DATE

October 2026 (Live Release)

00

Complete Administrator Sitemap & Route Hierarchy

Administrators possess complete read, write, update, and deletion permissions across all financial, user access, and academic tables. The table below illustrates the administrative sitemap.

Executive Command / Overview dashboard & KPI analytics - Gross & Net tuition collections - GST liabilities & pending dues - Active student & batch count - Direct enrollment shortcuts	Student Directory /students Learner lifecycle management - Add student & enrollment registration - Fee concession & installment allocation - Batch transfer & status modification - Direct invoice & attendance linkages
Invoices & Billing /invoices Tax compliant billing ledger - Paid, partial & overdue ledgers - Offline fee payment recording (UPI/Cash) - Digital GST invoice PDF generation - Automated tax calculation (9% CGST+SGST)	Curriculum & Courses /courses Course catalog configuration - Create course & set pricing tiers - Assign primary instructor trainers - Configure duration & competencies - Course Category & Skill tag mapping
Attendance Roster /attendance Cohort attendance tracking - Daily roll-call by course & batch - Mark Present, Absent, Late, Excused - One-click "Mark All Present" - Real-time automated saving	Assessments Studio /assessments Academic grading & evaluation - Create tests, assignments & quizzes - Import Google Forms & Sheets scores - Student Grading Studio & feedback - Individual submission re-grade / delete
Certificates & Verification /certificates Credentials & public QR verification - Eligibility check (Fees cleared + passed) - Issue verified certificate with unique code - Printable high-res PDF certificate - Public /verify verification portal	Access & Role Security /settings/users OTP generator & identity approval - Approve pending signups as Admin/Staff - Generate single-use OTP codes (7-day expiry) - Copy registration links for candidates - Revoke or upgrade permissions

01

System Authentication & Login Flow

Route: /login

All administrative actions require authenticated session access. Administrator accounts are linked to verified profiles with executive permissions.

Figure 1.1: System Sign-In Portal with highlighted credential inputs and action button.

Step	Element / Action	User Input / Description	System Behavior
1	Work Email Input	Enter your registered administrator email address (e.g. admin@thoorigai.test).	Validates RFC 5322 email syntax in real-time.
2	Password Input	Enter your confidential master password. Masked for security.	Ensures password length & complexity standards.
3	Sign In Button	Click to transmit credentials over secure TLS endpoint.	Authenticates with Supabase Auth, resolves executive profile, sets HTTP-only session cookie, and routes to Executive Dashboard.

Security Recommendation

Session cookies are partitioned with SameSite=Lax and HttpOnly headers. If session expiration occurs after 24 hours of inactivity, the user is redirected to /login automatically without data loss.

02

Executive Dashboard & Financial Command

Route: /

The central intelligence cockpit provides a real-time summary of revenue, collection efficiency, tuition receivables, pending approvals, and active academic cohorts.

Figure 2.1: Executive Dashboard with financial KPI cards, quick actions, and sidebar navigation.

Step	Element / Action	Description & Purpose	Resulting Workflow
1	Add Student Quick Action	Top-right primary CTA button located on the executive header.	Instantly triggers learner enrollment modal without needing to switch tabs.
2	Executive Financial Metrics	8 live calculation cards: Revenue collected, Total fees, Balance, Collection efficiency, Active students, Eligible certificates, Pending dues, Average fee.	Aggregates payments, discounts, and receivables in real-time directly from Postgres database.
3	Invoices Navigation	Direct link in the dark command sidebar to the billing ledger.	Navigates to /invoices for tax invoice generation and offline receipt recordings.
4	Admin Command Sidebar	Persistent left-side navigation displaying all 10 core administrative modules.	Provides instant 1-click access to all system modules, categorized by operations and settings.

03 User Management, Approvals & OTP Generation

Route: /settings/users

Security controls for onboarding staff and co-administrators. The system features an automated, single-use One-Time Passcode (OTP) invitation protocol with automatic expiration.

Figure 3.1: Users and Roles directory displaying Active Users, Pending Approvals, and OTP generation tools.

Step	Element / Action	Description & Parameters	System Consequence
1	Generate Invite Code	Top-right button triggering the invite generation modal.	Opens the OTP configuration dialog to create single-use invitation tokens.
2	Active Users Roster	Table displaying all registered users, roles (Admin/Staff), email, and creation date.	Click any user row to edit personal contact info, departmental metadata, or revoke access.
3	Approve as Admin	Dedicated action button on pending user signups.	Elevates pending user to full Administrator, updates JWT metadata, and grants complete permissions.
4	Approve as Staff	Alternative approval button for instructional staff.	Activates user with Staff permissions, restricting access to classroom and academic tools.

Creating Single-Use OTP Invite Links

Figure 3.2: Modal interface for creating scoped, time-bound Staff vs Admin invitation codes.

Step	Option / Control	Instructions	Security Effect
1	Staff Access Card	Click to select standard instructional privileges.	Generates prefix STAFF-XXXX. Restricted from financial data and settings.
2	Admin Access Card	Click to select executive administrator privileges. Highlighted in royal purple.	Generates prefix ADMIN-XXXX. Grants full system access upon redemption.
3	Expiration Window	Select duration: 1 Hour, 24 Hours (Standard), 3 Days, or 7 Days.	After this timestamp, the code automatically burns and cannot be redeemed.
4	Email Restriction (Optional)	Enter candidate's email address if you wish to restrict redemption to one person.	Only an account matching this exact email will be allowed to use this code.
5	Generate Code Button	Click to write the cryptographic invite token to the database.	Produces single-use link: <code>https://app/signup?code=...</code> ready to copy.

04

Student Lifecycle & Enrollment Management

Route: /students

Complete master registry of all enrolled learners, course batches, tuition payment balances, and academic progress indicators.

Figure 4.1: Student Directory with search filtering, enrollment status badges, and action triggers.

Step	Control	Action	Output
1	Search Students	Type student name, register number (e.g. STU-2026-001), email, or mobile.	Instant client-side filter updating the roster view without page reloads.
2	New Student Button	Click to open learner registration form.	Captures name, contact info, course selection, agreed fee, and initial installment.
3	Enrolled Students Table	View student ID, name, course, batch start, total fee, balance, and status.	Click any student row to view full billing history, attendance log, or issue certificate.

05

Invoicing, Payment Recording & GST Compliance

Route: /invoices

Official billing records, installment schedules, offline payment collection, and digital tax invoice issuance conforming to Indian GST regulations (CGST 9% + SGST 9% or IGST 18%).

Figure 5.1: Billing Ledger displaying invoice status (Paid, Partial, Overdue) and action buttons.

Step	Action	Data Entry Requirements	Financial Record Impact
1	Record Fee Payment	Click the primary "Record Payment" button to log an incoming payment.	Opens modal: select Student, enter Amount, Payment Date, Mode (UPI/Cash/Bank), and Reference #.
2	GST Invoice Ledger	Displays Invoice #, Student Name, Total Bill, Paid Amount, Balance, and Status.	Automatically recalculates balance and updates student financial status upon payment entry.
3	PDF Invoice Download	Click the download icon next to any invoice row.	Generates official PDF tax invoice with ThoorigAI GSTIN, legal address, tax breakdown, and QR code.

06

Course Curriculum & Program Catalog

Route: /courses

Configure training programs, syllabus structure, pricing tiers (Essential, Elite, Internship), course durations, and assign certified trainers.

Figure 6.1: Course catalog view with course category badges, fees, and creation triggers.

Step	Element	Description	Action / Result
1	Add New Course Button	Top CTA to create a new program in the academy catalog.	Prompts for Course Title, Short Code (e.g. FS-MERN), Category, Fee, and Duration.
2	Course Catalog & Pricing	Grid listing all courses with student enrollment counts and fees.	Allows editing syllabus outlines, modifying standard tuition, or archiving discontinued courses.

07

Course Materials & Learning Repository

Route: /materials

Digital asset management backed by secure cloud storage. Upload presentation slides, code repositories, assignments, and reference documents.

Figure 7.1: Course Materials interface with module selection and secure upload dropzone.

Step	Control	How to Use	Storage Behavior
1	Filter Course Module	Select the specific course from the dropdown selector.	Loads existing learning assets categorized by topic and week.
2	Upload Materials	Click or drag & drop files (PDF, PPTX, ZIP, MP4) up to 50MB.	Uploads to private Supabase Storage bucket with authenticated presigned download URLs.
3	Curriculum Assets List	Table of uploaded files with upload date, file size, and uploader name.	Direct download link or delete action for outdated lesson files.

08 Daily Attendance Tracking & Roll-Call

Route: /attendance

Batch-wise daily attendance marking with automated saving. Tracks attendance percentages required for certificate issuance eligibility.

The screenshot displays the 'Attendance Hub' interface. The sidebar on the left contains navigation links: Dashboard, Students, Invoices, Courses, Course materials, Certificates, Attendance (highlighted), Assessments, Reports, Audit Log, SETTINGS, GST Settings, Users and roles, Instructor assignments, Course categories, Skill tags, Brand information, and User settings. The main content area shows the 'Attendance Hub' title and a description: 'Record student daily sessions, inspect curriculum attendance rates, and audit presence logs.' Below this are four summary cards: 'OVERALL RATE' at 89.3% (Healthy), 'BATCHES TRACKED' at 7, 'TOTAL SESSIONS' at 103, and 'AT-RISK BATCHES' at 1 (<75% Attendance). A tab bar below these cards includes 'Daily Marking' (active), 'Course & Student Analytics', and 'Records & Audit Log'. The 'Mark attendance' section features a 'Live Roster' and 'Today's Session' toggle, a '< Prev Today Next >' navigation, and a 'Choose a course curriculum batch and session date to load the live student roster.' instruction. It includes a 'Course Curriculum' dropdown (labeled 'Course & Date Selector') with a 'Choose a course batch...' prompt, a 'Session Date' calendar picker set to 'Mon, Oct 5, 2026', and a 'Load roster' button. Below this is a large empty box with a user icon and the text 'Select a course to view and mark attendance' and 'Pick a course batch from the dropdown above or quick-select an active curriculum below.' At the bottom, a 'QUICK SELECT ACTIVE CURRICULUM' section shows 'Elite' and 'Essential' buttons.

Figure 8.1: Attendance Roll-Call screen with date picker, quick-mark actions, and student grid.

Step	Element	Action	Result
1	Course & Date Selector	Choose the target course batch and select the attendance date from calendar.	Renders student roll-call list for the selected cohort and session.
2	Mark All Present	Single-click shortcut button at top of attendance roster.	Instantly marks every student in the cohort as "Present" with a single action.
3	Roll-Call Roster	Interactive row per student: click [Present], [Absent], [Late], or [Excused].	Changes trigger debounced autosave to database; status indicator confirms save.

09

Assessments Studio & Google Forms Sync

Route: /assessments

Create academic tests, link Google Forms / Sheets for automated grading, enter qualitative trainer feedback, and maintain evaluation standards.

Figure 9.1: Assessments Studio with Google Forms sync modal, grading studio triggers, and tests roster.

Step	Action	Description	Resulting Workflow
1	Create Assessment	Define test title, target course, max score, passing threshold, and evaluation date.	Publishes assessment to course syllabus and initiates student submission tracking.
2	Import Google Forms/Sheets	Paste external Google Form URL and Google Sheets responses link.	Preserves live links for trainers and imports student score columns automatically.
3	Open Grading Studio	Click "Grade" next to any test to open the interactive evaluation table.	Review student submissions, input marks, type qualitative feedback, and save evaluations.

10

Certificate Issuance & QR Verification

Route: /certificates

Issue officially authenticated course completion certificates. Each certificate embeds a tamper-proof verification hash and QR code verifiable on /verify.

Figure 10.1: Certificate registry displaying issued credentials, verification codes, and PDF generation.

Step	Control	Eligibility & Operation	Output
1	Issue Certificate	System checks prerequisites: (1) 100% fees cleared, (2) Pass marks in assessments.	Generates unique verification code (e.g. VREF-CERT-1048-A9B8) with timestamp.
2	Certificates Registry	Displays student name, course, issue date, unique verification ID, and status.	Maintains an immutable record of all certified graduates.
3	Official PDF with QR	Click "Download" to generate vector-grade certificate PDF.	Renders high-resolution certificate with ThoorigAI seal, signature, and scan-to-verify QR code.

11

Reports, Analytics & Immutable Audit Trail

Routes: /reports & /audit-log

Export financial and academic analytics, and inspect the chronological database audit trail with correlation IDs.

Figure 11.1: Financial and Academic analytics tabs with CSV export options.

Step	Section	Information Provided	Export Options
1	Financial Revenue Reports	Monthly collection run-rates, course revenue breakdown, and GST tax collected.	Download accounting spreadsheet with full transaction details.
2	Academic Performance	Pass/fail ratios, batch average scores, and attendance percentage distribution.	Review cohort health and flag learners needing intervention.
3	Export Data (CSV)	One-click CSV generator at the top right of the reports dashboard.	Exports structured data ready for import into Excel, Tally, or external ERP systems.

12

System Settings & Academy Configuration

Routes: /settings/gst & /settings/brand

Maintain business tax compliance numbers and visual academy brand parameters.

Figure 12.1: Tax compliance settings configuring GSTIN, legal name, and tax percentages.

Step	Setting Field	Configuration Purpose	Impact
1	GSTIN Registration No	Enter the 15-character Goods and Services Tax Identification Number.	Printed on all official fee receipts and digital tax invoices.
2	Save Tax Configuration	Click to persist tax configuration changes to the database.	Instantly updates tax engine for all subsequent invoice calculations.

Figure 12.2: Academy identity parameters: legal business name, brand logo, and contact info.
